SWE_____ Final Class Project Concept Format

FS 2026

Proposed Project Title/Area

A concise and descriptive title of your project name.

Student Name(s)

- Registration number/Name

Previous Projects Done/Languages/frameworks used

List here all the projects/languages/frameworks you have done before.

Project Background and Justification

Provide context to the project:

- What problem are you addressing?
- Do such systems exist? What are their limitations that you are addressing?
- Why is this problem important?
- Include any relevant statistics or background research.

Project Objectives

List 3–5 clear objectives that guide what the project intends to achieve.

Project Scope

- Define what the project will and will not cover.
- Area eg agriculture, construction, education, retail etc.
- Clarify boundaries and limitations.

Proposed Methodology

- Describe the approach, framework, or process to be used,agile etc
- Mention tools, technologies, or data sources (if any).
- For technical projects, include system design, architecture, or algorithms.

Expected Outcomes/Deliverables

- Describe the final product or output (e.g., app, report, prototype).

- Include how it will benefit users or solve the problem.

Timeline

Provide a brief timeline or **Gantt chart** with major milestones and deadlines.

Resources Required

List any materials, equipment, software, or support needed.

Potential Challenges and Mitigation

Mention risks or obstacles and how you plan to address them.

References (if applicable)

List any sources used in APA 7 or another required citation style.

Github/Git

List of previous class projects

- Provide a brief one-paragraph summary of each project
